lasting esteem of his students and his colleagnes, and by his derotion to his science a lasting mame among his contemporaries.

The Observatory was formally dedicated May 15, 1901. The dedicatory address was given ly Astronomer W. J. Hussey, astronomer in the Lick Observatory. He spoke of "Astronomy and Modern Life." President Swain spoke of "Personal Lecollections of Dr. Kirkwood."

## A Theorem in Geometry. John C. Gregg.

DEF is the triangle formed by the tangents at the rertices of a triangle $A B C$ inscribed in the circle O. Draw EOP meeting BC in P and join PF. Show that EPF is a right angle.

## Demonstration.

Draw FG perpendicular to CA produced, and join OF . Denote the angles of ABC by $\mathrm{A}, \mathrm{B}, \mathrm{C}$, and the sides by a, $b, c$. Then

$$
\begin{aligned}
\mathrm{FG} & =\mathrm{AF} \sin \mathrm{~B} \\
& =\frac{\mathrm{c}}{2} \sec \mathrm{C} \sin \mathrm{~B} \\
& =\frac{\mathrm{b}}{2} \sin \mathrm{C} \sec \mathrm{C} \\
& =\frac{\mathrm{b}}{2} \tan \mathrm{C} \\
& =\mathrm{HP}, \text { which is perpendicu- }
\end{aligned}
$$

lar to CG. Hence HPFG is a rectangle and EPF is a right angle.
