

birds have flown. In just one month from the time I found the nest all trace of the birds was gone. It was twenty-four days from the time the first egg was laid in the nest until the nest was empty.

On May 4th I found a Robin's nest up high in the tree. Made like those above described. May 7th I found four blue-green eggs in the nest with the female on the nest. On May 14th two of the eggs were pipped. The mother was very nervous. On May 16th four little birds were in the nest. On May 21st the little birds were nearly feathered, and on the 23d the birds had flown.

BLUEBIRD.

May 21st I found a nest with one blue egg in an old and partially hollow tree. It was in a cavity on the east side about ten inches from the opening. The nest was lined with fine feathers, but in pulling off the bark much of the loose, decayed stuff fell into the nest. May 23, the nest has been robbed and the lining pulled out.

LIST OF MAMMALS, REPTILES AND BATRACHIANS OF MONROE COUNTY.
