

A TROPICAL REPTILE NEAR RICHMOND, INDIANA.

BY D. W. DENNIS.

A large reptile, *Iguana tuberculata*, was taken three miles from Richmond, Ind., in October. The man who shot it, a negro, undertook to carry it home by the tail and broke off what he estimates was a foot and a half of the end of its tail. What remains is about three and a half feet long. As this is a tropic species, we suppose that it must have escaped from some traveling show or from some private collection. No clue has been found. The skin will be prepared for the Earlham museum by Ward of Rochester.
