

that one had taken undue advantage of her in any way. She was indefatigable in her labors in the classroom, often remaining through the lunch hour to prepare materials for the afternoon classes or assist a student who was behind in his work, and she was usually the last to leave the laboratory in the evening.

Miss Barkley was born February 23, 1878 at Henrietta, Missouri. Her high school work was done at Woodson Institute at Richmond, Missouri. In 1907 she graduated from the University of Missouri with the A. B. degree and also with a B. Sc. in Education. All of her graduate work was done at the University of Chicago where she received the Master of Science degree in 1922 and the degree of Doctor of Philosophy in 1926.

Following her graduation from the University of Missouri she became head of the Science Department of Meridian College, Meridian, Mississippi where she remained until 1915. The last two years of her stay at Meridian she was also Dean of Women. From 1915 to 1923 she held a professorship in the Department of Biology of John Fletcher College. During the year 1925-26 she was an instructor of plant morphology at the University of Chicago. She came to DePauw University as Assistant Professor of Botany in 1926 which position she held to the time of her death.

She was a lifelong member of the Methodist Episcopal Church and had deep religious convictions. She also was a member of the American Association for University Women, the Business and Professional Woman's Club, Sigma Xi, the American Association for the Advancement of Science, the Botanical Society of America, and the Indiana Academy of Science. She took great interest in all of these organizations and was a regular attendant at their meetings.

She published two pieces of research. These reflect considerable credit on her as a technician and student. Her first paper was entitled "Secondary Stelar Structures of *Yucca*." Her second paper was on the "Differentiation of Vascular Bundle of *Trichosanthes anguina*." Both papers were published in the Botanical Gazette, the first, December 1924, and the second, April, 1927.

Doctor Barkley was ever ready to come to the assistance of her associates with her knowledge and time. One of her striking characteristics was her fine spirit of cooperation. Her chief delight, however, was in working with students with whom she was always on most excellent terms. She was a frequent guest in their houses of residence and seemed to hold their confidence at all times.

T. G. YUNCKER, DePauw University.

EMIEL DEWULF

SOUTH BEND, INDIANA.

March 26, 1883.

SOUTH BEND, INDIANA.

May 21, 1930.

Death claimed an outstanding University official, a valued member of the Congregation of Holy Cross, and a faculty member in the person of the Reverend Emiel DeWulf, C.S.C., director of studies at the University, Wednesday evening in Saint Joseph's Hospital. Father DeWulf was ill but five days, his sudden death coming as a shock to faculty and students.

When Father DeWulf entered the hospital his condition was not regarded as serious, his stay there being more for a rest than for anything else. Tuesday evening his condition became grave and on Wednesday morning he was administered the Last Sacraments of the Church. Members of his family and members of the faculty of the University were present at the bedside when the end came at 7:30 p. m.

Father DeWulf was born in South Bend, Indiana, on March 26, 1883. He attended the parochial schools of South Bend, entered the University in 1899, and was graduated in 1903. He pursued his education at Holy Cross College, Washing-

ton, D. C., and was ordained to the priesthood on June 28, 1908. He made a graduate study of mathematics at Catholic University and began his teaching career at Saint Edward's University, Austin, Texas, where he also served as prefect of discipline and director of studies. In 1914 he succeeded the Reverend John Boland, C.S.C., as president of the University.

RECALLED TO NOTRE DAME

Being recalled to the University of Notre Dame in 1917, Father DeWulf taught in the College of Science, teaching astronomy and physics. He remained a member of the faculty until he was appointed director of studies in 1927, a position he has held for the past three years.

As director of studies Father DeWulf was responsible for many improvements in the system of registration and choice of studies by the students. Through his duties as director of studies were arduous and time-consuming, Father DeWulf, courteous and quiet of voice, was always ready to help the student whether he was senior or freshman, and whether he wanted advice on a course of studies or merely a copy of the University catalogue. Father DeWulf was an inspiration to all who came in contact with him. His place will be hard to fill.—R. I. P.
