

PROGRAM OF THE SECTION ON CHEMISTRY

Chairman: J. M. FULMER, DePauw University

1. Some reflections on organic chemical formulas. Wm. M. Blanchard, DePauw University.
2. Selenium dioxide as an oxidant. J. F. Deupree and R. E. Lyons, Indiana University.
3. Seleno-cyanation of aniline. T. H. Chao and R. E. Lyons, Indiana University.
4. The production of hydrogen selenide by heating paraffine with selenium in the presence of a catalyst. T. H. Chao and R. E. Lyons, Indiana University.
5. Conductometric titration of iron, aluminum, and magnesium. E. W. Kanning and E. H. Lewis, Indiana University.
6. Catalytic esterification with dihydroxyfluoboric acid. J. W. Kroeger, F. J. Sowa, and J. A. Nieuwland, University of Notre Dame.
7. A fractionation column employing absorbents. R. J. Hartman and D. H. Jung, Indiana University.
8. Preparation and properties of 2, 3, 4, 6 tetraethyl-alpha-ethyl-D-glucoside. Wendell H. Kinkley and Ed. F. Degering, Purdue University.
9. A lecture demonstration in organic chemistry. Ed. F. Degering, Purdue University.
10. The preparation and properties of some ethoxy-compounds. Ned Guthrie, Hanover College.
11. Experimental meningococcal infection of mice. Vernal Irons, Texas State Department of Health, Austin, Texas.

Papers No. 2, 3, 4, 5, 6, 7, and 9 were read by title. The following title of a paper published in this volume was not included in the published program:

Esterification in the presence of anhydrous salts. H. T. Briscoe, Indiana University, and F. M. Whitacre, Case School of Applied Science.

Dr. Paul D. Wilkinson, of Indiana State Teachers College, was elected chairman of the section for 1937.
