

INDEX
to the
PROCEEDINGS OF THE INDIANA ACADEMY OF SCIENCE
Volume 115
2006

Alien oriental weatherfish	32	Eastern Corn Belt Plain	170
Alien species	32, 136	Environmental quality	110
Alix, Mitchell S.	13	Extirpation, fishes	139
Alligator gar	140	Federally-endangered mussels	108
Anthropogenic landscape	44	Fen	91
Aquatic insects	110	Fiber, Tara J.	1
Aquatic survey methods	83	Financial report	77
Aquatic flora	13	Fish assemblages	121, 170
Aquatic macrophytes	13	Fisher, Brant	83, 103
Ashumbala Nature Preserve	100	Flesher Woods	100
Bald cypress	100	Floodplain vegetation	94
Banded pygmy sunfish	140	Floristic quality assessment	13
Bats	149	Foos, K. Michael	1
Beall Woods State Park	100	Forbes, Stephen A.	139
BioBlitz	82	Forest communities	94
Biodiversity	82, 136	Freshwater mussels	103
Biological assessment	156	Gammon, James R.	80, 139, 187
Biological integrity	170	Gibson County	54, 100
Biotic integrity	156	Gibson Lake	53
Bird surveys	37	Gilbert, Charles H.	139
Brack, Virgil	44	Gilt darter	145
Branch initiation (<i>Neurospora</i>)	7	Goose Pond Cypress Slough Nature Preserve	100
Branching	7	Gravel barrens	90
Breeding colony, terns	53	Gravel hill prairie	90
Brodman, Robert	82, 84	Greater redhorse	140
Brown County	37	Green hawthorn	101
C values	13	Habitat, bat	44
Cane Ridge Wildlife Area	58	Harequin darter	145
Castrale, John S.	53	Harelip sucker	139
Central Till Plain Natural Region	90	Hayes, Timothy	53
Cerulean warblers	37	Hellenthal, Ronald	83
Channel darter	140	Hemmer Woods	100
Cherrybark oak	101	Homoya, Michael	89
Chitinase	1	Hoosier National Forest	37
Chitosanase	1	Hypha	7
Clean Water Act	121	IBI	170
Clinton County	121	Ichthyology	136
Cobitidae	32	IDEM	110
Cope, Erwin D.	137	Index of Biotic Integrity	156, 170
Crane, Kevin	121	Indiana birds	37, 53
Cypriniformes	32	Indiana flora	13
Darters	140	Indiana myotis	44
<i>Dendroica cerulea</i>	37	Indiana rare vascular plants	89
DePauw University	188	Insects	110
DeVault, Travis L.	53	Interior River Lowland	170
Distribution of fishes	121	Invasive exotics	32
Douglas, Michael B.	53	Islam, Kamal	37
Eastern sand darter	145		

- Jackson County 37
 Jackson, Marion 60, 82, 84, 94
 Jean, Robert 84
 Jones, Kelly 32
 Jordan, David S. 137
 Karns, Daryl 79, 82
 Lake Michigan basin 32
 Lake sturgeon 140
Larus delawarensis 53
 Lawrence County 37
 Least tern 44
 Lesueur, Charles A. 137
 Limestone outcrop 90
 Little bluestem prairie 100
 Lower Wabash Valley 94
 Macroinvertebrates 110
 Mammals 149
 Maternity roosts, bats 44
 McMurray, Paul 110
 Mills, Charles E. 53
 Minutes, Indiana Academy 71
Misgurnus anguillicaudatus 32
 Morgan County 37
 Morgan-Monroe State Forest 37
 Morphology 7
 Morris, Charles C. 121, 156
 Multi-habitat 110
 Muscatuck River 80
 Mussels 103
Myotis sodalis 44
Myriophyllum spicatum 26
 Nest success, tern 53
Neurospora crassa 7
 Newhouse, Steven 110
 Newport Chemical Depot 44
 Nonindigenous species 32
 Northern brook lamprey 140
 Order Unionoida 103
 Osage River 147
 Otter Creek 82
 Overcup oak 101
 Pale hickory 101
 Pecan 101
 Persimmon 101
Pilobolus 1
 Popeye shiner 140
 Porter County 13, 100, 150
 Post oak 101
 Prairie Creek 152
 Presettlement forests 94
 Probabilistic design 110, 156
 Productivity, terns 53
 Pyron, Mark 79, 187
 Radiotelemetry 44
 Rafinesque, Samuel C. 136
 Rapid Assessment Program 82
 Rare natural communities 89
 Reference condition 170
 Rhodes, Olin 53
 Ring-billed gull 53
 Ripley County 60
 Rodents 149
 Rothrock, Paul 82, 84
 Ruch, Don 1, 82, 84
 Sand barrens 91
 Sand prairie 91
 Sandstone outcrop 90
 Scott, Peter 82, 84
 Scribailo, Robin W. 13
 Ship ballast 32
 Shrews 149
 Shumard's red oak 96
 Silver Lake 13
 Simon, Thomas 79, 82, 121, 136, 156, 170
 Sobat, Stacy L. 121, 156
 Song perch selection 37
 Song-perch trees 37
 South Fork Wildcat Creek 121
 Southern red oak 101
 Southern Bottomlands Natural
 Region 92, 98
 Southwestern lowland flatwoods 92, 99
 Southwestern Lowlands Natural
 Region 91
 Sphaeroplasts 1
 Sporangiospores 1
 Spotted darter 145
 Status, fishes 136
 Status of least tern 53
 Stephan, Alison K. 121, 156
Sterna antillarum 53
 Successional history 21
 Sugarberry 101
 Swamp chestnut oak 101
 Swamp cottonwood 101
 Sweet gum 101
 Tallgrass prairie 91, 92
 Tern Bar Slough 58
 Terre Haute 80
 Terrestrial natural communities 89
 Terrestrial survey methods 83
 Territory, bird 37
 Threatened and endangered fishes 136
 Tippecanoe County 121
 Tippecanoe darter 146
 Tipton County 121
 Tree species 94
 Twin Swamps Prairie Nature Preserve 100
 Valparaiso 15
 Vanderburgh County 100
 Vascular flora 89
 Vermillion County 44
 Vigo County 82, 100, 150
 Wabash County, Illinois 100
 Wabash River
 89, 103, 110, 121, 136, 156, 170, 187
 Wabash River bottoms 149

Wabash River fishes	121	Whitaker, John	44, 60, 82, 84, 149
Wabash River Symposium	79	White River	139
Warrick County	100	White River, East Fork	80
Water locust	101	Wildcat Creek	121
Watershed condition	121	Winged elm	101
Weatherfish	32	Yellowwood State Forest	37
Wesselman Woods	100	Zygomycetes	1

INSTRUCTIONS TO AUTHORS

(revised December 2006)

General information.—Manuscripts and all correspondence should be sent to the Editor. To be eligible for publication in the *Proceedings* at least one author must be a member of the Academy. Submission of a manuscript to the Editor implies that it has not been sent to another publication, nor has it been published elsewhere. If it is accepted for publication in the *Proceedings*, it may not be republished without the written consent of the Academy.

All manuscripts are evaluated by referees. Submit three copies of the manuscript. Figures in manuscripts for review may be submitted as photocopies, and they should be approximately the size that they will be printed in the *Proceedings*.

After the manuscript has been accepted, the author will be asked to submit two paper copies and an electronic version of the manuscript. Galley proofs will be sent to the primary author for approval and correction.

Voucher specimens and permits.—Voucher specimens of species used in scientific research should be deposited in a recognized scientific institution. Authors must indicate that the collection of specimens, especially threatened or endangered species, was authorized by the appropriate governmental organization. Those making the identifications of specimens should be identified.

Style.—Do not use right or full justification. Also, use a non-proportional font (e.g. Courier, but not Times Roman).

Running head.—The author's surname(s) and an abbreviated title should be typed all in capital letters and must not exceed 60 characters and spaces. The running head should be placed near the top of the title page.

Title page.—The title page should include (1) the title in capital letters, (2) each author's name and address, (3) the running head, and (4) the complete name, address, telephone number, FAX number, and e-mail address of the author with whom proofs and correspondence should be exchanged.

Abstract.—All manuscripts have an abstract, which should summarize the significant facts in the manuscript. The "ABSTRACT" heading in capital letters should be placed at the beginning of the first paragraph set off by a period. Use complete sentences, and limit the abstract to one paragraph and 250 words.

Keywords.—Give 3–5 appropriate keywords following the abstract.

Text.—Double-space text, tables, legends, etc. throughout, printing on only one side of the page. Three categories of headings are used. The first category (METHODS, RESULTS, etc.) is typed in capitals, centered, and on a separate line. The second (lower) category of heading, in bold type, begins a paragraph with an indent and is separated from the text by a period and a dash. (This paragraph begins with an example of this heading.) The third heading category may or may not begin a paragraph, is italicized and followed by a colon. (The paragraph below is an example.) The metric system must be used unless quoting text or referencing collection data.

Citation of references in the text: Cite only papers already published or in press. Include within parentheses the surname of the author followed by the date of publication. A comma separates multiple citations by the same author(s) and a semicolon separates citations by different authors, e.g., (Smith 1990), (Jones 1988; Smith 1993), (Smith 1986, 1987; Smith & Jones 1989; Jones et al. 1990).

Conclusions.—Do not have a conclusions section. This information should be in either the abstract or the discussion.

Literature cited.—Use the following style, and include the full unabbreviated journal title. Repeat the name for multiple references by the same author. Note that book titles have the first letter of each word capitalized.

Walter, J. & B. Hallet. 1979. Geometry of former subglacial water channels and cavities. *Journal of Glaciology* 23:335–346.

Walter, J. 1992. The significance and complexity of communication in moths. Pp. 25–66, *In* *Insect Communications: Mechanisms And Ecological Significance*. (P.N. Work & J.S. Rivers, eds.). Princeton University Press, Princeton, New Jersey.

Footnotes.—Footnotes are permitted only on the first printed page to indicate current address or other information concerning the author. These are placed together on a separate page at the end of the manuscript. Tables and figures may not have footnotes.

Tables.—These should be typed double-spaced, one table to a page and numbered consecutively. Most tables contain only three horizontal lines (see recent issues for examples). Do not use vertical lines or shading. Include all pertinent information in the table legend (no footnotes).

Illustrations.—Figures submitted electronically should be at least 300 dpi. All hard-copy art work must be camera-ready (mounted and labeled) for reproduction. Figures should be arranged so that they fit (vertically and horizontally) the printed journal page, either one column or two columns, with a minimum of wasted space. When reductions are to be made by the printer, pay particular attention to width of lines and size of lettering in linedrawings. Multiple photos assembled into a single plate should be mounted with only a minimum of space separating them. In the case of multiple illustrations mounted together, each illustration must be numbered (Fig. 1, Fig. 2, etc.) rather than given letter (A, B, etc.) designations. The name(s) of author(s), and an indication of top edge, and whether the illustration should be one or two columns wide, should be written on the back of the illustration. The overall dimensions of hardcopy artwork should be no more than 11 inches (28 cm) x 14 inches (36 cm). In manuscripts for review, photocopies are acceptable, and should be reduced to the exact measurements that the author prefers in the final publication. Make notations in the manuscript margins to indicate the preferred position of illustrations in the printed text. Color plates can be printed; but the author must assume the full cost, currently about \$600 per color plate.

Legends for illustrations should be placed together on the same page(s) and separate from the illustrations. Each plate must have only one legend, as indicated below:

Figures 1–4.—Right chelicerae of species of *Centruroides* from Timbuktu. 1. Dorsal view; 2. Proximal view of movable finger; 3. *Centruroides* holotype male; 4. *Centruroides* male. Scale = 1.0 mm.

Page charges and reprints.—There are no page charges, but at least one of the authors must be a member of the Academy. Corrections in proof pages must be restricted to printer's errors only; all other alterations will be charged to the author (currently \$3 per line).

Reprints are available only from the Allen Press and should be ordered (with payment) from the Allen Press when the author receives the proof pages.

Proceedings of the Indiana Academy of Science

Volume 115

Number 2

2006

Papers of the Wabash River Symposium

Introduction

The Wabash River Symposium by Daryl R. Karns, Mark Pyron and Thomas P. Simon 79

Results of a Short-Term BioBlitz of the Aquatic and Terrestrial Habitats of Otter Creek, Vigo County, Indiana by Daryl R. Karns, Donald G. Ruch, Robert D. Brodman, Marion T. Jackson, Paul E. Rothrock, Peter E. Scott, Thomas P. Simon and John O. Whitaker, Jr. 82

Botany

A Brief Survey of the Rare Terrestrial Natural Communities and Associated Vascular Flora of the Wabash River Corridor in Indiana by Michael A. Homoya 89

Forest Communities and Tree Species of the Lower Wabash River Basin by Marion T. Jackson 94

Zoology

Current Status of Freshwater Mussels (Order Unionoida) in the Wabash River Drainage of Indiana by Brant E. Fisher 103

An Annotated List of the Aquatic Insects Collected in 2004 in the Wabash River Watershed, Indiana by Paul D. McMurray, Jr. and Steven A. Newhouse 110

Present and Historic Distribution of Fishes in South Fork Wildcat Creek, Tippecanoe, Clinton and Tipton Counties, Indiana by Alison K. Stephan, Charles C. Morris, Stacey L. Sobat and Kevin J. Crane 121

Biodiversity of Fishes in the Wabash River: Status, Indicators, and Threats by Thomas P. Simon 136

Small Mammals of the Wabash River Bottoms by John O. Whitaker, Jr. ... 149

Changes in the Condition of the Wabash River Drainage from 1990-2004 by Stacey L. Sobat, Charles C. Morris, Alison K. Stephan and Thomas P. Simon 156

Development, Calibration and Validation of an Index of Biotic Integrity for the Wabash River by Thomas P. Simon 170

Biography

James R. Gammon: The Wabash River Man by Mark Pyron 187
