

The National Museum of American Art, Smithsonian Institute, Museum Shop, Washington, DC 20560 has a list of available publications with prices, including exhibition catalogs.

*The Golden Section and the Work of Caris* is an exhibition catalog of a Dutch artist, Gerard Caris, who has lived in the United States and recently had an exhibition at the Parsons School in New York. Over the past 12 years, Caris has built up a body of work based upon the pentagon, demonstratively useful as a new building construct in art, architecture and general design.

To discover new application purposes of a formal primary form that has been around for at least 2,400 years but has never received much attention has been puzzling to the artist and has allowed him to explore the reasons why by working with it. The book is in Dutch and in English, dealing with the imaginative geometry of Caris and his applications of the form to many structures.

The book will be available from the artist who has recently left for Holland to work on some of his projects, and can be reached at Glacisweg 42, 6212 BP Maastricht, Holland.
