PROCEEDINGS

OF THE

COMMON COUNCIL.

ADJOURNED SESSION.

CHAMBER OF THE COMMON COUNCIL OF THE CITY OF INDIANAPOLIS, WEDNESDAY, JUNE 30, 1869, 71 O'CLOCK, P. M.

The Common Council met pursuant to adjournment.

Present-His Honor, the Mayor, Daniel Macauley, in the chair, and the following members:

Councilmen Brown, Cottrell, Gimber, Harrison, Heckman, Kahn, Kennington, Locke, Marsee, Newman, Pyle, Shepherd, Thalman, Thoms, Weaver, Whitsit, Wiles and Woodburn-18.

The proceedings of the regular session held June 28th, 1869, were read and approved.

Reports from City Officers being in order,

The Chief Fire Engineer made the following report:

INDIANAPOLIS, June 21, 1869.

To the Members of the Common Council of the City of Indianapolis:

GENTLEMEN :--- I have the honor to submit to you the Ninth Annual Report of the Indianapolis Fire Department, being for the year ending the 18th of May, 1869.

It embraces a detailed statement of the Receipts and Expenditures of the Department, with a detailed statement of the expenses for each Company, the number of fires and alarms, and the amount of losses and insurance on the same; also, the number of men employed and their names. The force of the Department comprises a Chief Engineer, three Engineers

of Steam Fire Engines, three drivers of engines, three drivers of hose reels,

one driver of hook and ladder truck, one telegraph inspector, who also drives the extra hose reel, two watchmen on the Tower, and twelve hosemen, (the last named do duty only at fires,) total, twenty-nine men.

The apparatus consists of three steam fire engines, in good service; one condemned fire engine, not in service; four hose reels, in good order; 3,400 feet of rubber hose, not very reliable; one hook and ladder truck, with the necessary ladders and hooks; and one steam pump, for filling cisterns.

necessary ladders and hooks; and one steam pump, for filling cisterns. The number of horses in the Department during the year is fifteen; the cost of feeding the same for the year amounts to \$1,391.29; being to each horse, per year, \$92 751, or a trifle over 25 cents per day to each horse. The number of horses in the Department, at present, is fourteen.

The total amount of expenditures of the Department from May 18, 1868, to May 18, 1869, amounts to \$24,294.56.

From this amount should be deducted-

The balance due and paid on the construction of the Fire Alarm Telegraph properly chargeable to last year's expenses

The repairs and painting of Engine No. 2, which was contracted for	φ2,100	00
last year	610	35
The amount paid into the City Treasury	371	00
Total	\$3 748	01

This amount deducted will leave the actual expenses for the year \$20,546.55, as follows:

For salaries of officers and members	\$16,886 97
Other expenses for the year	3,659 58
Total	\$20,546 55
Amount paid chargeable to last year's expenses	\$3,748 01
Total amount	\$24,294 56
There have been sixty-six fires and alarms to which the Department	turned out.
The amount of losses by fire and water amounts to	\$38,797 65
Amount of insurance on the same	19,557 65

Leaving a total loss over insurance of ______\$19,240 00

The heaviest loss being in the destruction of the dry kiln of Cary & Brother, the loss of which is represented to be \$10,000.

The loss of the Starch Factory is not estimated in the above, it being outside of the city.

Allow me to call your attention to the fact that there is but one officer to the whole Fire Department, namely, the Chief Fire Engineer, and that in case of sickness said officer should at any time be prevented from being present at fires, there is no one to give any directions that has authority to do so, and you will see at once the necessity that some person be appointed to act as an assistant to the Fire Engineer, in case said officer should be absent, with the same power and authority to give directions as the Chief Engineer, and that such Assistant Engineer be held responsible for all acts that he may suffer to be committed, and for all orders that he may give, believing that the services of a suitable person could be procured for a small salary, as his duties would only be to attend fires.

I would further recommend that you would pass an ordinance for the regulation and government of the Fire Department, prescribing the duties ofthe officers and members of said Department, there being no ordinance to that effect at this time.

I would further ask that you would pass an ordinance to prevent persons from obstructing public cisterns and wells, and also to prevent persons from driving over hose, and also preventing persons not firemen from riding on any of the fire apparatus unless it be with the consent of the Chief Engineer.

In concluding this report, allow me, gentlemen, to return my thanks to His Honor, the Mayor, and to the members of the Council for the honor conferred on me in again electing me Chief Engineer; and especially do I owe thanks to Messrs. Coburn and Kappes, former members of the Committee on Fire Department, for their uniform kindness and courtesy; and to the members of the Fire Department for their promptness in responding at all times, and the manner in which they have performed their duties; and also to Thomas S. Wilson, Chief of Police, and the members of the Police Force for Respectfully submitted, their assistance.

CHARLES RICHMANN, Chief Fire Engineer.

1868.

1868.

May 28.

RECEIPTS.

July 7. From Samuel Hanway, for lame horse	\$75	00
October 9. From Daniel Glazier, for old hose	11	00
November —. From James Steward, for disabled horse	90	01
1869.		
April 1. From cash for disabled horse	100	00
May 15. From John Fishback, for old hose	50	00
May 15. From Field, Braden & Co., for old hose	45	00
Total	\$371	00

Which amount I have paid into the City Treasurer, R. S. Foster, and taken his receipt for the same.

Balance on hand April 1, 1869, after paying entire indebtedness, ex- cept Railroad Bonds of \$110,000.00, due in 1888	\$48,391	34
	0000001	0.4

\$228,391 34

From which it will be seen that during the year, the floating debt has been reduced \$79,000, while the balance in the Treasury has been increased \$19,-956.39.

It will also be seen that during the year the receipts from taxes and other sources of current revenue, exclusive of bank loan, the sale of 10 per cent. warrants have been \$306,607.87; while the current expenses of the city have been \$215,632.76, or that the current expenses have been \$90,975.11 less than the current receipts, and that the balance in the Treasury April 1, 1869, exceeds the entire indebtedness of the city, except the Railroad Bonds amounting to \$110,000.00, due 1888, \$48,391.34.

[Adjourned Session,

I will state that we are now making final settlement with the City Treasurer, from May 12, 1867, to May 12, 1869, and as soon thereafter as possible I will report to you again, setting forth in detail the recepts and expenditures from the 26th day of March, 1866, to May 12, 1869, inclusive.

DANIEL M. RANSDELL, City Clerk.

Which was accepted.

The City Gas Inspector made the following report:

OFFICE OF CITY GAS INSPECTOR, Indianapolis, June 28, 1869.

To the Mayor and Common Council of the City of Indianapolis:

GENTLEMEN:-In continuance of my answer to Mr. Kennington's motion of the 7th instant. I shall, in this report, show-

First. What the city lost, in Gas and Light, during the contract year 1868-9.

Second. That the private consumer wastes gas from excessive and variable pressure.

Third. That the maximum burning pressure in this city should not be over fifteenth tenths.

The discussion of these propositions will be in plain language, brief and concise.

1. What the City lost, in Gas and Light, during the contract year 1868-9. By the terms of the contract between the Indianapolis Gas Light and Coke Company and the City of Indianapolis, as entered into on the 1st of May, 1868, the city agreed to burn its public gas lamps two thousand hours in each year, during the continuance of the contract, paying said Gas Company \$24 per annum for the gas furnished each lamp thereinunder, exclusive of the Government tax. For said Company to earn this \$24 per annum per lamp, it must supply the gas at the rate of four cubic feet per hour during each and every hour the lamps are burned; for four feet per hour on a time table of two thousand hours will give eight thousand cubic feet of gas, which at \$3 per one thousand cubic feet amounts to \$24—no more and no less. If, by any circumstances, therefore, this amount of gas is not honestly and positively furnished to the lamps the failure to do so involves the Gas Company in a violation of both its charter and contract; for, under the former, it is not allowed to charge more than \$3 per thousand feet for gas, exclusive of Government tax, and in cellecting \$24 for less than eight thousand feet it violates its charter; while, just in proportion to the deficit in supply, does the city pay for more gas than she receives.

the city pay for more gas than she receives. The contract referred to also provides that the Gas Company shall furnish burners used in the public lamps at its own expense, "which shall be of an average capacity and consume four cubic feet per hour." By the change made on or about the 1st of May, 1868, common iron fishtail burners were put in the lamps, which will barely pass four cubic feet per hour under one inch (10-10ths) of water pressure, with a livlier flame than is usually given them, and decidedly "blowing" when the passage of gas is over four feet per hour.

In lighting the lamps, the burner-key is fully opened, the burning match applied to the issuing gas, and then "educated fingers" turn back the burner-key until the flame ceases to "blow." Such is the wonderful scientific education the men and boy lamlighters must possess! At the moment this difficult and intricate regulation of the flame has been accomplished, the burner will pass at the rate of four feet, or less, per hour. And at no time subsequent to the lighting, except in rare instances, not occurring more frequently than half dozen times during the past year, does the pressure in the mains again rise to the pressure at which the lamps were lighted, the gas is only passed for a few seconds according to the law of the contract, and a loss

in gas and light immediately commences. If the pressure should happen to go above the lighting point (seldom done), the flame will "blow," the gas be wasted, while the light is lessened.

It is a fixed gas law, that the discharge of gas is doubled by the application of four times the pressure, and that on equal diminution in supply follows the inversion of the rule. Following out these axioms, I have prepared an original table showing "The effect of the reduction of pressure, by half-tenths, upon the delivery of gas through various sizes of burners." As my calcula-tions admit of proof at every step, I know that this table is positively accurate.

Mr. Samuel Hughes, an English gas engineer, in his Treaties on Gas Works, page 289, third section, published in 1866, shows the relation of consumption of gas to light-giving by the following table:

"A fishtail consuming 5 feet per hour, the light is equal to 10 candles.

The same reduced to $3\frac{1}{2}$ feet per hour, the light is equal to 5.5 candles. The same reduced to $1\frac{1}{2}$ feet per hour, the light is equal to 2.4 candles.

The same reduced to 11 feet per hour, the light is equal to 0.6 candles.

The above table, and several other paragraphs in the same chapter of the Treaties spoken of, having been introduced by Mr. Stacey, in a communication to the Council, dated March 11th, 1867, and to be found on pages 716–1,7 proceedings of the Common Council 1866–7, as the results of his investigations. I have accepted them, and thereupon based another original table, setting for the time in light from reduction of another original table, setting forth "The loss in light from reduction of consumption, by .025 of a cubic foot.

Applying these tables to the record of pressure in the street main nearest my office, and assuming that pressure to b · a just average for the entire city (which is more than fair towards the Gas Company, as my office is only about one thousand yards from the Gas Works, and is elevated above them, while many of the public lamps are two and a half to three times as distant, and therefore subjected to a diminished pressure, and consequent reduced supply of gas, through loss by friction in the mains), I am now prepared to show what was the loss in gas and light in the last six months of the first contract years (1868-9), during which time a Pressure Register has been in operation at my office:

	g to	Lamps	Loss in Gas.		Loss in Light.			Loss in Gas and Light.		
Years and Months.	No of lamps, according Gas Co.'s bills.	No. of Hours the Lar were burned.	Maximum deficit, per Lamp.	Minimum deficit, per Lamp.	Maximum percent- age per Lamp.	Minimum perceutage, per Lamp.	Average percentage, during month.	Aggregate deficit dur- ing month, in cubic feet.	Money value of deficit \$320 per 1000 cubic fe	
1868. November December	794 795 795 795 795 802	$ \begin{array}{r} 208\frac{1}{2} \\ 210 \\ 216\frac{3}{4} \\ 201 \\ 192\frac{1}{2} \\ 173\frac{3}{4} \\ \overline{1,202\frac{1}{2}} \\ \end{array} $	13,554 10,838 14,503 12,235 10,263 11,053	0.546 0.154 0.413 0.461 0.583 0.335	0.434 0.342 0.553 0.400 0.374 0.475	0.062 0.017 0.055 0.042 0.044 0.050	$\begin{array}{c} 0.207\\ 0.177\\ 0.251\\ 0.252\\ 0.197\\ 0.259\end{array}$	186.300 118,200 149,900 161,000 120,800 144,400 880,600	\$596.16 378.24 479.58 515.20 386.56 462.68 \$2.817.82	

Now, as the remainder of a time table of 2000 hours is 800 hours, which is 4-10ths of 2000 hours we will add 4-10ths to the total deficit in gas and light, as above shown, and we find that the deficit for the year is 1,232,800 cubic feet, and the money value of the same, at \$3.20 per 1006 cubic feet, is \$3,944 96! Is not the city entitled to a drawback for at least this sum?

If all the elements of decreased local pressure, caused by greater distance from the Works, etc., were taken into account, and all the burners used in the lamps were examined and tested, the money value of the loss, in my

[Adjourned Session,

judgment, would be nearer \$5,000 than the sum estimated. How many burners there are that will not pass four feet per hour under 10-10ths pressure, at which I have made my calculations, or how many three feet burners, like the one I found in Tennessee street, are in use, no one knows, at present, but the Superintendent of the Gas Works. The chances are, however, that I have been more liberal than just, and that the city, and, consequently, her tax payers, have suffered more than I here show.

II. That the Private Consumer wastes Gas from Excessive and Variable Pressure.

After the public lamps are once lighted, and regulated to a four feet flame, the burner-keys are not again touched until the time comes for extinguishing the lamps. The loss in gas and light, by them, is, therefore, continuous though slightly variable. The careful private consumer, however, has the consumptions of his gas somewhat under his control.

At the time business rooms and residences need artificial lighting, the gas pressure is generally at its maximum. Having lighted his burner, the private consumer finds that the flame is too lively, or blows; and he, therefore, reduces the supply of gas, by turning back the key. A few minutes later, the light is not sufficient; the gas is turned on more. In a short time, his burner is inclined to or is blowing; again he is compelled to diminish the supply. Ten o'clock comes, and the light in his room goes down by the run, so that he can hardly see; the burner-key is opened to its fullest extent. Within half an hour his burner again whistles at a lively rate; his "educated fingers" repeat and re-repeat their former work, until 12 o'clock midnight, when, if our consumer be still at labor, his light dimishes suddenly, as at 10 o'clock, but becomes far dimmer, so that with a fully open key he can scarcely get light enough to see by.

Now, every time a burner passes a too lively flame, gas is wasted; and no matter how careful a consumer may be, how attentive he is to the condition of his flame, or how frequently his "educated fingers" manipulate the burner-key, he will allow more or less gas to escape without being burned

So long as consumers are ignorant of the means for preventing wastage, and are not taught how to economically and wisely manage their gas, so long will the remedy for this wrong be delayed, unless the Council, as guardians of the public, shall decide that wastage of gas, when induced and compelled by excessive and variable pressure, is a tacit, if not actual, violation of the Gas Company's Charter, which provides that "all gas sold shall be *accurately* measured by said Company." The consumer wishes a certain kind and amount of light. If the pressure of gas is excessive, his burners will blow, and he loses gas and light; if the pressure is not sufficient, the light is diminished greatly out of proportion to the saving of gas; if the pressure be variable, he again loses both gas and hight, and is forced to be continually manipulating the burner-key with his "educated fingers," to save himself from greater loss. Nothing but an equitable and equable pressure will give him true satifaction, or permit the gas furnished to be accurately measured."

III. That the Maximum Burning Pressure in this City should not be over Fifteen-Tenths.

Mr, Samuel Hughes, whom I have already quoted, says (page 252) that "In many establishments, the maximum pressure in the town does not exceed one inch (10.10ths) to one and one-quarter inch (124-10ths), a minimum pressure of 5-10ths being obtained in the lowest part of the district, which is sufficient and ample." Again, on page 289, he says that "fishtails and batswings, to burn advantageously, requires a pressure of 3-10ths to 4-10ths." Dr. Letheby, another distinguished English gas expert, in his Ninth Report to the Corporation of London, states, that "Gas ought to be delivered to the public at not less than half an inch (5-10ths) of water pressure; and it may be said that, in practice, this is found to be the best pressure at which gas can be consumed."

No citizen of Indianapolis needs to be informed that this city is one of the "deadest level" towns in the country; our imperfect system of surface drainage has proven that to him. Gas, unlike water, runs up hill, and with an increasing velocity. The Gas Works are on a lower level than a major portion of the town. If 5-10ths is sufficient pressure at which to well and satisfactorily furnish gas; and if, as I have shown, gas is wasted by excessive and variable pressure.—I would suggest to the Council that it can establish for the Gas Company a maximum, minimum, and average pressure, from which it shall not be allowed to vary, except to its loss and damage. Should this change demonstrate that some portions of the city could not be satisfactorily supplied, it will only prove that the street mains are not large enough, and not that the statements of such high authorities as Mr. Hughes, Dr. Letheby, and other experienced and learned gas experts are erroneous and false.

Permit me, then, to recommend,

1. That the Council insist that the gas be let on the mains, at the highest pressure, from one-half to one hour before sundown.

2. That at aud after lighting private burners and the public lamps, the average pressure over the city be made to steadily indicate neither more nor less 10-10ths.

3. That the rusted and imperfect burners, at present on the street lamps, be at once ordered to be changed to good brass burners, capable of properly passing full four cubic feet per hour under a pressure of 10-10ths, while they will not oxydise and become fraudulent in a few weeks' use like iron burners.

4. That the old burners now in use be, each and every one, turned over to the Committee on Gas Light and the City Gas Inspector for examination, as well as for test, if the latter be thought advisable.

These proper and just regulations being carried out, the Gas Company will have done nothing but it is fair and right it should do, the onus of wrong will be removed, and few complaints will be heard about too much or too little gas supply.

Respectfully submitted,

GEO. H. FLEMING, City Gas Inspector.

Which was received.

The Street Commissioner made the following report:

INDIANAPOLIS, June 23, 1869.

To the Mayor and Common Council of the City of Indianapolis:

For the information of your honorable body, the Street Commissioner would respectfully submit the following report of all the work done by him, with the cost of the same, since his accession to office, with a statement of the present standing of each ward in relation to funds, also a statement of the price per yard paid for gravel.

FIRST WARD.

1.	Opened Railroad ditch between New York rnd North streets	\$19	00
2.	Hauled 15 yards of gravel and repaired the crossing on East and		
	Lockerbie streets	11	00
3,	Repaired the culvert on Alabama street and Massachusetts Avenue	4	50
4.	Opened the gutters on New Jersey street, between North and Michi-		
	gan streets	13	00
5.	Opened the gutters on Liberty street, between New York and North		
	streets	18	50
6.	Hauled 56 yards of gravel on Liberty street, between North and N.		
	York streets	43	00
7.	Opened the gutters on New York street, between Liberty and Noble		
	streets	7	00

COUNCIL PROCEEDINGS. [Adjourned Session,

	Repaired the culvert on the south side North and Delaware streets Removed the old derrick on Vermont and Meridian streets		50 00
10.	Repaird the crossing on New York and Meridian streets Placed a new culvert on New Jersey and North streets, $\frac{1}{2}$ each	3	50 50
	Total	\$183	00

SECOND WARD.

1.	Hauled 6 yards of gravel on the crossing of the Peru Railroad and		
	Massachusetts Avenue	4	50
2.	Hauled 9 yards of gravel and repaired the crossing on Pennsylvania		
	and St. Joseph streets	6	00
3.	Opened railroad ditch between North and St. Clair streets	15	00
4.	Cleaned and repaired the culverts on St. Clair and Railroad streets	10	00
5.	Hauled 11 yards of gravel and repaired the gutter crossing on Mas-		
	sachusetts Avenue and North streets	8	00
6.	Opened the gutters on New Jersey street from Massachusetts Avenue		
	to Fort Wayne Avenue	35	00
7.	Placed a new culvert on the west crossing of New Jersey and North		
	streets, half each	46	50
3.	Hauled 4 loads of cinders and repaired the crossing on Pennsylvania		
	and Pratt streets	3	50
9.	Repaired the culvert on Pennsylvania street and Ft. Wayne Avenue	1	50
	Total	\$130	00

THIRD WARD.

1.	Cleaned and repaired the culvert on Meridian and Pennsylvania sts	28	00
2.	Opened the gutters on Mississippi street, between Market and New		
	York streets	11	00
3.	Hauled 51 yards of gravel and repaired Mississippi st., between Mar-		
	ket and New York streets	40	00

And we have a deficit of ______ \$929 05

In answer to a resolution passed by the Common Council June 21, '69, directing the Street Commissioner to report to your honorable body the price paid per yard for gravel.

I would most respectfully state that I have paid Messrs. Hanway and Lefever twenty five (25) cents per yard for 743 yards of gravel loaded on my wagons.

About three-fourths of the above amount was pit gravel, the remaining one-fourth was creek gravel.

In addition, I would most respectfully ask of your honorable body the privilege of putting up in the Police or Clerk's office a box, marked, Orders for Street Commissioner. And I would respectfully recommend that your honorable body make it the duty of each and every Policeman to take a note of any bridge or culvert coming under his observation which may be in a dangerous condition, and drop the same in said box, believing that such a simple arrangement would much facilitate the repair of dangerous bridges and culverts, and thereby aid in removing one of the sources of the City's liability to damage. Most respectfully submitted,

AUGUSTUS BRUNER, Street Commissioner.

Which was received.

Also, the following report:

INDIANAPOLIS, June 28, 1869.

D

To the Mayor and Common Council of the City of Indianapolis :

GENTLEMEN :--- I have the honor to report the following done according_to contract:

Samuel Hanway for repairing South Delaware street, between Wyoming Street and the Madison Road, with one hundred and fifty yards of screened River gravel, at one dollar and fifty six cents per cubic yard, \$234.00.

Most respectfully,

AUGUSTUS BRUNER. Street Commissioner.

Which was concurred in.

COUNCIL PROCEEDINGS.

[Adjourned Session,

The City Commissioners made the the following report:

INDIANAPOLIS, April 10, 1869.

To the Mayor and Common Council of the City of Indianapolis:

GENTLEMEN:—The Commissioners of Streets and Alleys respectfully submit the following report in the matter of the extension of Georgia street through from Pennsylvania street to Virginia Avenue, to the width of fifty feet, that pursuant to a notice they met at the office of the City Clerk on Monday, March 29, 1869, and proceeded to view the ground to be appropriated to said street, and find the value of the property to be appropriated, to-wit, \$14,764, for thirty-five feet through lot No. 98, and fifty feet through lot No 84. That no part of the expense of opening said street shall be borne by the City of Indianeolis. That the property balay nemed are demeaded upper the

That no part of the expense of opening said street shall be borne by the City of Indianapolis. That the persons below named are damaged upon the real estate described to the sums set opposite their names, to-wit:

.....\$14,945 86

On motion, the consideration of the report was laid over for one week.

The City Clerk made the following report:

INDIANAPOLIS, June 28, 1869.

To the Mayor and Common Council of the City of Indianapolis:

GENTLEMEN :— The City Clerk respectfully reports to the Common Council that there are on file in his office the following affidavits for the collection of street assessments by precept, as follow :

Michael Shea vs. S. B. & A. B. Flowers. for \$15.41. Michael Shea vs. C. J. Brackebush, for \$4.06. Michael Shea vs. Adams Franzman, for \$3.68.

Michael Shea vs. W. H. Loomis, for \$9.18.

Michael Shea vs. Thomas Earl, for \$6.09 Michael Shea vs. Samuel Delzell, for \$6.20.

And would respectfully recommend that you order the precepts to issue. Respectfully, D. M. RANSDELL, City Clerk.

Which was concurred in, and the precepts ordered.

ORDINANCES ON SECOND READING.

On motion, the following ordinances were read the second time and ordered to be engrossed.

Special ordinance No. 48—1869. Special ordinance No. 60, " Special ordinance No. 50, " Special ordinance No. 49, " Special appropriation ordinance No. 23—1869. Special appropriation ordinance No. 24, " General ordinance No. 29—1869. General ordinance No. 27, "

General ordinance No. 28, "

General ordinance No. 31, "

General ordinance No. 30-1869, protecting public morality, de-

cency and order, was taken up and read the second time.

Mr. Cottrell offered the following amendment:

That the 5th section of said ordinance be amended by striking out all of said section after the words "one hundred dollars."

Dr. Woodburn moved to lay the amendment on the table.

The ayes and noes being demanded,

Those who voted in the affirmative were Councilmen Gimber, Harrison, Heckman, Newman, Pyle, Thalman, Weaver, Wiles and Woodburn-9.

Those who voted in the negative were Councilmen Brown, Cottrell, Kahr, Kennington, Locke, Marsee, Shepherd, Thoms and Whitsit -9.

There being a tie vote, His Honor, the Mayor, voted in the affirm-ative.

So the amendment was laid on the table.

Mr. Brown moved to strike out the imprisonment clause in the 14th section for drunkenness.

Dr. Woodburn moved to lay the motion on the table.

The ayes and noes being demanded,

Those who voted in the affirmative were Councilmen Harrison, Kahn, Locke, Newman, Pyle, Thalman, Weaver, Wiles and Woodburn-9.

Those who voted in the negative were Councilmen Brown, Cottrell, Gimber, Heckman, Kennington, Marsee, Shepherd, Thoms and Whitsit-9.

There being a tie vote, His Honor, the Mayor, voted in the negative.

So the motion to lay on the table was lost.

Mr. Gimber moved to reconsider the vote just taken, laying Mr. Cottrell's amendment on the table.

The question being on reconsidering,

Those who voted in the affirmative were Councilmen Brown, Cottrell, Gimber, Harrison, Kahn, Kennington; Marsee, Shepherd, Thalman, Thoms and Whitsit-11.

Those who voted in the negative were Councilmen Heckman, Locke, Newman, Pyle, Weaver, Wiles and Woodburn-7.

So the vote was reconsidered.

The question being on the adoption of Mr. Cottrell's amendment,

Those who voted in the affirmative were Councilmen Brown, Cottrell, Gimber, Kahn, Marsee, Shepherd and Whitsit-7.

Those who voted in the negative were Councilmen Harrison, Heckman, Kennington, Locke, Newman, Pyle, Thalman, Thoms, Weaver, Wiles and Woodburn—11.

So the amendment was lost.

The question being on the engrossment of the ordinance,

Those who voted in the affirmative were Councilmen Harrison Heckman, Locke, Marsee, Newman, Pyle, Thalman, Thoms, Weaver, Wiles and Woodburn—12.

Those who voted in the negative were Councilmen Brown, Cottrell, Gimber, Kahn, Shepherd and Whitsit-6.

So the ordinance was ordered to be engrossed.

[Regular Session,

On motion by Mr. Cottrell, the vote taken at the meeting of Council, held June 28, 1869, striking from the report of the Committee on Streets and Alleys the third paragraph, was reconsidered, and on his motion, the said paragraph was concurred in, and the contract awarded.

ORDINANCES ON THIRD READING.
