Cover photo: This is a photo of dead animals on the road at the Celery Bog at West Lafayette, Indiana. All of the "smudges" in the photo are dead vertebrates killed by automobiles. A related study (data not reported in this issue) indicated that over an 18 month period that thousands of frogs, salamanders were killed there. In some problem areas, culverts and walls have been installed to prevent this problem. See related study in this issue. Photo by J. Andrew DeWoody.
