

## Records of Indiana Coleoptera, II

N. M. DOWNIE, Purdue University

In an earlier paper, the writer (3) presented a list of 75 species of Coleoptera which were not listed in Blatchley's *Coleoptera of Indiana*, (1). The present paper contains an additional list of 68 species not recorded in Blatchley's book or in the companion volume (2). Many of the species mentioned in this list were identified by using the above-mentioned volumes. Mr. C. A. Frost of Framingham, Mass., examined and named some of the species. Mr. David Kissinger of Huntsville, Alabama and Mr. Elbert Sleeper of Long Beach, California identified certain of the weevils.

In the list which follows the months are abbreviated Ap., M., Je., Jl., Au., S., and O. Also Tippecanoe County is noted as T., Bartholomew as B., Parke Co., as P., and the sand dunes of Porter County as SD. The numbers and the nomenclature of Leng's Catalog and supplements (4) are used throughout. Species not noted as occurring in Indiana in either of the Blatchley volumes are marked with an asterisk (\*).
