

INDEX
to the
PROCEEDINGS OF THE INDIANA ACADEMY OF SCIENCE
Volume 112
2003

<i>Acanthocystis polymorpha</i>	170	shrimp, freshwater	175
<i>Achyranthes japonica</i>	22	sponges, freshwater	32
Alluvium	97, 102	reptiles	43
Aloor, J.	1	salamanders	46, 48
Amphibians	43	snakes	50
Amphibians, abundance	51	turtles	50
Amphibians, rare	52	Chiroptera	55, 61, 75
Anslinger, Brendan	97	Clark County	22, 117
Aquilani, Steven	186	<i>Clematis terniflora</i>	23
Artifacts as assignments	88	Climate change	97, 106
Ascomycota	132	Community, bird	186
Avian community	187	Coon Cave, bats	61
Badger, Kemuel	135	Cope, James	75
Barnes, David	29	Cores, Miles site	118
Bats, status	55	Crawford County, bats	75
Bats	55, 61, 75	Crawford County, plants	22
Batwing Cave, bats	61	Crayfish	175
Betz, Lindsay	9	Cristidiscoid Heliozoa	169
Big brown bat	65, 81	Cultural features, Miles site	119
Bird communities	186	Decapoda, distribution	175
Birds, in oak forest	186	Diplopoda	36
Botany Glen	135	Distribution records, Indiana plants	22
Brack, Virgil	61, 75	Dominguez-Rosado, Elena	109
Braun, Uwe	132	Dunlap, Keith	61
Breeding bird community	186	Durbin, James	97
Brodman, Robert	43	Early succession, prairie	160
Bryozoans	29	Eastern pipistrelle	61, 65, 81
Buckeye	9	Ectoprocta	29
Burned sites, birds of	186	<i>Egeria densa</i>	23
Cambaridae	175	Elm	9
<i>Cambarus</i>	175	Endangered plants	26
Carbon cycle class exercise	85	Environmental literacy	85
Cave millipeds	36	Environmental science course	85
Centrolelid Heliozoa	170	Evening bat, status	55
Checklists		<i>Fallicambarus</i>	175
amphibians	43	<i>Fatoua villosa</i>	23
birds	189	Fertilizer, tallgrass prairie	160
bats	61, 75	Fire management, birds	187
bryozoans	32	Fire and bird communities	186
crayfish	175	Floodplain forest	135, 139
frogs	46, 48	Flora, Botany Glen	135
Heliozoa	169	Floristic inventory, Botany Glen	135, 136
herbarium, IU Southeast	22	Floyd County, plants	22
lizards	50	Forest composition, Happy Valley	9
millipeds	36	Forest structure, Happy Valley	9
plants of Botany Glen	147	Forest succession, Happy Valley	9
plants of Happy Valley	9	Fourier-transformed IR spectroscopy	109, 110, 112
plants of southern Indiana	22		

Fresh motor oil	109	McWhinney Heavy Stemmed	117
Freshwater sponges	29	<i>Melothria pendula</i>	23
Freshwater bryozoans	29	<i>Mentha x rotundifolia</i>	23
Freshwater shrimp	182	Mesic forest, Botany Glen	138
Freshwater heliozoa	169	Metals in oil	114
Frogs, checklist	46, 48	Micronutrient enrichment, prairie	160
FTIR techniques	109	Miles site, Indiana	117
Function, Miles site	125	Millipeds	36
Fungus, persimmon	132	Minutes of IAS meetings	92
<i>Fusicladium levieri</i>	132	Mist-netting, bats	57
Gas chromatography	109, 110, 111	Morrell, Thomas	186
Geomorphic processes	97	Mortuary features, Miles site	122
Global climate, exercise	89	Motor oil breakdown	109
Glutathione-S-transferase	1	<i>Myotis sodalis</i>	61, 81
Grant County, plants	135	Nb2	1
Gray myotis	61, 65, 80	Neotropical bird migrants	186
Grotto Cave, bats	61	Nitrogen, prairie	160
Gummer, Sherry	55	Northern myotis	61, 65, 80
Guy, Danise	97	Nuclear magnetic resonance spectroscopy	109, 110, 114
Hafted bifaces	120	<i>Nycticeius humeralis</i>	55
Happy Valley plants	9	Oaks	9
Heat shock protein	1	Ohio buckeye	9
Heliozoa	169	Ohio Valley archeology	117
Herbarium, Indiana University Southeast	22	Orange County, geology	97
Hibernacula, bats	61	<i>Orconectes</i>	175
Hibernation, bats	75	<i>Orthodon dianthera</i>	23
Hoosier National Forest	36, 187	<i>Packera anonyma</i>	23
Hsp70	1	<i>Palaemonetes</i>	175
Hughes, J.P.	1	Palaemonidae	175
Human population exercise	88	Paleosol	97
<i>Humulus japonicus</i>	23	<i>Papaver dubium</i>	23
Hunter-gatherer settlement	117	Parasite, fungal	132
Hydrocarbons	109	Patoka River	175, 176
Indiana myotis, endangered	61	Persimmon fungus	132
Indiana myotis	63, 81	Phosphorus, prairie	160
Indiana University Southeast Herbarium	22	Pichtel, John	109
Jefferson County, forest	9	<i>Pinaciophora fluviatilis</i>	170
Johnson, Scott	61	Plant collection, IU Southeast	22
Jones, Ryan	97	Plant community	135
Jug Hole Cave, bats	61	Plants, endangered	24, 26
Karst drainage	97	Plant records, by Indiana county	24
Karst Gulf	97	Plants, vascular	22
King, C.S.	1	<i>Platanthera lacera</i>	26
Ko, W.	1	Porifera	29
Lake County, sponges and bryozoans	32	Porter County, sponges and bryozoans	32
Late Archaic	117	Prairie, micronutrients	160
LaPorte County, sponges and bryozoans	32	Prairie community, development	163
Lauer, Thomas	29	Prairie restoration	160
LeBlanc, David	186	Pre-service teachers	85
Lewis, Julian	36	Prentice, D.A.	1
<i>Liparis loeselii</i>	23	<i>Procambovus</i>	175
Lithics	117	Protista	169
Little brown myotis	61, 65, 82	<i>Pseudotremia reynoldsae</i>	36
Lizards, checklist	50	<i>Pterocystis fortiesca</i>	170
Management, fire and birds	186	<i>Pycnanthemum muticum</i>	26
Maple	9	<i>Raphidiophrys intermedia</i>	170
Maternity colonies, bats	59	<i>Raphidocystis flabellata</i>	172
Maxwell, Richard	22	<i>Raphidocystis tubifera</i>	172
McMillan, Paul	9		

Rare plants	27	Stratigraphy	97, 100
Ray's Cave	61	Succession, forest	1
Red bat	79	Succession, tallgrass prairie	160
Reptiles of Indiana	43	Succession	9
Reptiles, rare	52	Successional forest	135
Rothrock, Paul	135, 160	Successional communities	141
Ruch, Donald	135	Sugar maple	9
Ruhl, Gail	132	Survey, reptiles	43
Salamanders, checklist	46, 48	Survey, amphibians	43
Scholler, Markus	132	Tallgrass prairie	160
Science education	85	Teacher artifacts	85
Secondary succession	9	Thermal features, Miles site	123
Secondary successional forest	146	Thoma, Roger	175
Sedimentation	97	Thomas, William	22
<i>Selaginella eclipes</i>	26	Threatened plants	26
Shaeffer, Amy	85	Tornado damage, forest	9
Shrimp, freshwater	175	Trees, succession	16-18
Silver-haired bat	65, 75, 80	Turtles, checklist	50
Simon, Thomas	175	Twin Domes Cave, bats	61
Slippery elm	9	Upland forest	135
Snakes, checklist	50	Used motor oil	109
Soil amendments	163	Vascular plant collection	22
<i>Solanum sarachoides</i>	26	Vascular plants, Botany Glen	147
Songbird	186	Weathered motor oil	109, 111
Southeastern myotis	80	Wesley Chapel Gulf	97
Sponges, freshwater	29	Whitaker, John	55, 61, 75
Squiers, Edwin	160	White, Andrew	117
Stathmin	1	Wintering populations, bats	61
Stonehouse, Amanda	135	Wujek, Daniel	169
		Wyandotte Cave, bats	61, 75, 82

INSTRUCTIONS TO AUTHORS

(revised October 2001)

General information.—Manuscripts and all correspondence should be sent to the Editor. To be eligible for publication in the *Proceedings*, at least one author must be a member of the Academy. Papers that have been presented at an Academy meeting may be given preference for publication. Submission of a manuscript to the Editor implies that it has not been sent to another publication, nor has it been published elsewhere. If it is accepted for publication in the *Proceedings*, it may not be republished without the written consent of the Academy.

All manuscripts are evaluated by referees. Submit three copies of the manuscript. Figures in manuscripts for review may be submitted as photocopies, and they should be approximately the size that they will be printed in the *Proceedings*.

After the manuscript has been accepted, the author will be asked to submit the manuscript as a paper copy and on a computer disc in a widely-used word processing program. Indicate clearly on the computer disc the **word processing program** and the **type of computer** (Mac or PC).

Galley proofs will be sent to the primary author for approval and correction.

Style.—Do not use right or full justification. Also, use a non-proportional font (e.g. Courier, but not Times Roman).

Title page.—The title page should include (1) the title in capital letters, (2) each author's name and address, (3) the running head (see below), and (4) the complete name, address, and telephone number of the author with whom proofs and correspondence should be exchanged, a FAX number and electronic mail address if available.

Abstract.—All manuscripts have an abstract, which should summarize the significant facts in the manuscript. The "ABSTRACT" heading in capital letters should be placed at the beginning of the first paragraph set off by a period. Use complete sentences, and limit the abstract to one paragraph and 250 words.

Keywords.—Give 3–5 appropriate keywords following the abstract.

Text.—Double-space text, tables, legends, etc. throughout. Three categories of headings are used. The first category (METHODS, RESULTS, etc.) is typed in capitals, centered, and on a separate line. The second (lower) category of heading, in bold type, begins a paragraph with an indent and is separated from the text by a period and a dash. (This paragraph begins with an example of this heading.) The third heading category may or may not begin a paragraph, is italicized and followed by a colon. (The paragraph below is an example.) Use only the metric system unless quoting text or referencing collection data.

Citation of references in the text: Cite only papers already published or in press. Include within parentheses the surname of the author followed by the date of publication. A comma separates multiple citations by the same author(s) and a semicolon separates citations by different authors, e.g., (Smith 1990), (Jones 1988; Smith 1993), (Smith 1986, 1987; Smith & Jones 1989; Jones et al. 1990).

Literature cited section.—Use the following style, and include the full unabbreviated journal title. Repeat the name for multiple references by the same author. Note that book titles have the first letter of each word capitalized.

Walter, J. & B. Hallet. 1979. Geometry of former subglacial water channels and cavities. *Journal of Glaciology* 23:335–346.

Walter, J. 1992. The significance and complexity of communication in moths. Pp. 25–66. *In* *Insect Communications: Mechanisms and Ecological Significance*. (P.N. Work & J.S. Rivers, eds.). Princeton University Press, Princeton, New Jersey.

Footnotes.—Footnotes are permitted only on the first printed page to indicate current address or other information concerning the author. These are placed together on a separate page at the end of the manuscript. Tables and figures may not have footnotes.

Running head.—The author's surname(s) and an abbreviated title should be typed all in capital letters and must not exceed 60 characters and spaces. The running head should be placed near the top of the title page.

Tables.—These should be typed double-spaced, one table to a page and numbered consecutively. Most tables contain only three horizontal lines (see recent issues for examples). Do not use vertical lines or shading. Include all pertinent information in the table legend (no footnotes).

Illustrations.—All art work must be camera-ready (mounted and labeled) for reproduction. Figures should be arranged so that they fit (vertically and horizontally) the printed journal page, either one column or two columns, with a minimum of wasted space. When reductions are to be made by the printer, pay particular attention to width of lines and size of lettering in line drawings. Multiple photos assembled into a single plate should be mounted with only a minimum of space separating them. In the case of multiple illustrations mounted together, each illustration must be numbered Fig. 1, Fig. 2, etc.) rather than given letter (A, B, etc.) designations. The name(s) of author(s), and an indication of top edge, and whether the illustration should be one or two columns wide, should be written on the back of the illustration. The overall dimensions should be no more than 11 inches (28 cm) × 14 inches (36 cm). Larger drawings present greater difficulty in shipping and greater risk of damage for which the *Proceedings* assumes no responsibility. In manuscripts for review, photocopies are acceptable, and should be reduced to the exact measurements that the author prefers in the final publication. Make notations in the text margins to indicate the preferred position of illustrations in the printed text. Color plates can be printed; but the author must assume the full cost, currently about \$600 per color plate.

Legends for illustrations should be placed together on the same page(s) and separate from the illustrations. Each plate must have only one legend, as indicated below:

Figures 1–4.—Right chelicerae of species of *Centruroides* from Timbuktu. 1. Dorsal view; 2. Prolateral view of moveable finger; 3. *Centruroides* holotype male; 4. *Centruroides* male. Scale = 1.0 mm.

Page charges and reprints.—Page charges are currently \$10 per journal page for members of the Academy and \$70 per page for non-members. Corrections in proof pages must be restricted to printer's errors only; all other alterations will be charged to the author (currently \$3 per line).

Reprints are available only from the Allen Press and should be ordered (with payment) when the author receives the proof pages. Allen Press will not accept reprint orders after the paper is published.

CONTENTS

Proceedings of the Indiana Academy of Science

Volume 112

Number 2

2003

Geology

- Wesley Chapel Gulf revisited: Geomorphic processes affecting development of the alluvial floor of a karst gulf in Orange County, Indiana** by James M. Durbin, Ryan C. Jones, Brendan Anslinger, and Danise Guy 97

Chemistry

- Chemical characterization of fresh, used and weathered motor oil via GC/MS, NMR and FTIR techniques** by Elena Dominguez-Rosado and John Pichtel 109

Anthropology

- The Late Archaic component of the Miles site, Clark County, Indiana** by Andrew A. White 117

Botany

- Fusicladium levieri*, a fungal parasite of persimmon, found in Indiana** by Markus Scholler, Uwe Braun, and Gail Ruhl 132

- A floristic inventory and description of the structure and composition of the plant communities of Botany Glen, Grant County, Indiana** by Amanda L. Stonehouse, Kemuel S. Badger, Donald G. Ruch, and Paul E. Rothrock 135

- Early succession in a tallgrass prairie restoration and the effects of nitrogen, phosphorus, and micronutrient enrichments** by Paul E. Rothrock and Edwin R. Squiers 160

Zoology

- Freshwater heliozoa (Protista, Heliozoa) from Indiana** by Daniel E. Wujek 169

- Distribution patterns of freshwater shrimp and crayfish (Decapoda: Cambaridae) in the Patoka River basin of Indiana** by Thomas P. Simon and Roger F. Thoma 175

- Breeding bird communities in burned and unburned sites in a mature Indiana oak forest** by Steven M. Aquilani, Thomas E. Morrell, and David C. LeBlanc 186

- Index to Volume 112 (2003)** 192
