

INDEX
to the
PROCEEDINGS OF THE INDIANA ACADEMY OF SCIENCE
Volume 114
2005

Abernathy, Matthew	55	Clifton, Indiana	34
<i>Achyranthes japonica</i>	19	Conservation	207
Agricultural insects	105	Crawford County	17, 19, 50
Allen County	15	Crayfish	34
<i>Ambystoma</i>	211	Culicidae	62
Amphibians	207	<i>Cuscuta indecora</i>	23
Anderson, Allyson K.	83	Decapoda	34, 55
Anura	210	Delaware County	15
Aquifer	1	Diptera	62
Araneae	111	Distribution, crayfish	55
Arthropods	105	Distribution records, plants	19
Ash, Scott P.	19	Doss, Paul K.	1
Ash borer	106	Draney, Michael	111
Asian mosquito	62	<i>Dreissena polymorpha</i>	33
<i>Bacopa rotundifolia</i>	23	Dubois County	17
Barker Woods Nature Preserve	13, 15	Earth-tide induced water-level changes	1
Barometric induced water-level changes	1	Earth-tides	1
Barometric efficiency	1	Economic importance, insects	105
Bartholomew County	216	Edgar County	34
Bat communities	73	<i>Egeria densa</i>	23
Bats	70, 73, 216	<i>Elliptio dilatata</i>	33
Bedrock aquifers	1	Emerald ash borer	106
Beekeeping	106	Englum, Lynn	55
Bendix Woods Nature Preserve	13, 15	Estes, Adam	62
Bentfield, Douglas	62	<i>Euphorbia prostrata</i>	23
Big Oaks NWA	15	<i>Euphorbia obtusata</i>	24
Biography	224	Evansville	26
Bivalvia	33	Everson, Brianne	70
Botany Glen	13, 15	Exotic insects	106
Brack, Virgil	216	Fall Creek Gorge Nature Preserve	13, 15
Brood X, cicadas	65	Faunistics, spiders	111
Brouilletts Creek basin	33	Financial report for 2004	82
Brown County	216	Flint Barrens	15
Brown, Robert J.	1	Floristic Quality Assessment	9
Cambaridae	34, 55	Floristic quality index	9
Camp Atterbury, bats	73, 216	Floyd County	19
Caudata	209	Fogwell Forest Nature Preserve	13, 15
Central Till Plain Natural Region	13	Folsom, Michael	65
<i>Ceratophyllum echinatum</i>	23	Foraging, bats	70
<i>Chamaesyce serpens</i>	23	Foster, Brad	62
Checklist, spiders	111	Fox Lake	13, 15
<i>Clinopodium vulgare</i>	23	FQI	9
Chiroptera	216	Franklin limestone	2
Cicadas	65	Freeman, Lori	55
Cicadidae	65	Freshwater mussels	33
<i>Cirsium arvense</i>	28	Fruit, insects	108
Clark County	19	Gap analysis	111
<i>Clematis pitcheri</i>	24	Gascho Landis, Andrew M.	207

Gibb, Timothy	105	Lehman, Elizabeth	111
Ginn Woods	15	Life history, crayfish	55
<i>Glechoma hederacea</i>	28	Lime Lake Nature Preserve	13, 15
Gordon, Scott A.	26	Linton, Mary C.	207
Goshen County	207	<i>Lonicera japonica</i>	28
Grain, insects	110	Lookout Point Gravel Hill Prairie	16
Grand Prairie Natural Region	13	Louderman, James	111
Grant County	13, 15, 16	<i>Ludwigia decurrens</i>	24
Great Lakes states, spiders	111	<i>Lunaria rediviva</i>	23
Groundwater system	1	<i>Lysimachia nummularia</i>	28
Gummer, Curtis	216	Macrofossil analysis	85
Habitat, crayfish	55	Madison County	16
Hall, Robert D.	83	Managed lands, bats	73
Hanover College	224	Martin County	16, 50
Hardcastle, Edith	26	Mastodon	83
Harrison County	15, 19, 50	Maxwell, Richard H.	19
Hemiptera	65	McDonough, Mollie	62
Hemlock Bluff Nature Preserve	15	Mean C	9
Herbarium	19	Medland, Vicki	111
Hoary bat	70	<i>Melilotus officinalis</i>	28
Holocene	83	Merry Lea Environmental Center	207
Homoya, Michael A.	9	Michigan, spiders	111
Howard, Art	216	<i>Microtus</i>	99
Howell Wetlands	26	Midwest spider fauna	111
Illinois, spiders	111	Minutes of 2004 meetings	77
Illinois mussels	33	Moberly, Steven P.	62
Impacted areas, bats	73	Mollusca survey	33
Indiana, cicadas	65	Morris, Charles C.	34
Indiana, mosquitoes	62	Mosquito	62
Indiana, spiders	111	Mounds State Park	13, 16
Indiana crayfish	55	Mussel	33
Indiana flora	9, 19, 26	<i>Najas gracillima</i>	24
Indiana mussels	33	Natural area Assessment	9
Indiana Univ. Southeast Herbarium	19	Noble County	207
Indiana vascular plants	19	Nocturnal behavior, bats	70
Indiana water level	1	Nurseries, insects	107
Indianapolis, bats	70	<i>Obovaria subrotunda</i>	33
Indianapolis airport, bats	70	<i>Ochlerotatus japonicus</i>	62
Inglefield sandstone	1	Ohio cicadas	65
Inkenbrandt, Paul C.	1	Ohio spiders	111
Insects	105	Orange County	50
Insects, urban	109	<i>Orconectes theaphionensis</i>	43
Invasive insects	106	Ornamentals, insects	109
Jackson County	15, 50	Paleobiology of vertebrates	98
Jefferson County	19	Paleoecology	83
Johnson, Scott	55	Parke County	16
Johnson County	216	Pascoe, Frank	111
Jorck, Katherine	55	<i>Passiflora incarnata</i>	28
Karns, Daryl	224	Patoka River, crayfish	58
Keller, Jennifer	26	Pennsylvanian Patoka Formation	2
Kritsky, Gene	65	Periodical cicadas	65, 109
Lake Michigan, crayfish	60	Perry County	13
Lake Michigan Natural Region	13	Perry County Limestone Glade	16
Lalor, Craig	62	Perry County Sandstone Glade	16
Landscape, insects	109	Petty, William H.	83
LaPorte County	16	Pfiester, Margie	65
<i>Lasiurus cinereus</i>	70	<i>Phragmites australis</i>	28
Late-Pleistocene	83	Pickett, Thomas J.	1
Lawrence County	50	Pierce, Christopher	105

Plant conservation	9	<i>Strophostyles leiosperma</i>	24
Plaster Creek Seep Springs	16	Swinehart, A.L.	83
<i>Pleurobema clava</i>	33	Taphonomy	101
Pollen analysis	85	<i>Taxodium distichum</i>	28
Pollen profile	93	Taxonomy, crayfish	34, 55
Polygonal fissures	83	Thomas, William E.	19
Posey County	2, 16	Tiemann, Jerry S.	33
Prairie Creek	74	Timm, Anne E.	34
Prentice, Thomas	111	Tippecanoe County	17
<i>Procambarus</i>	34	<i>Torilis arvensis</i>	23
<i>Procericambarus</i>	34	<i>Tragia cordata</i>	24
<i>Ptychobranchus fasciolaris</i>	33	Turkey Run State Park	13, 16
Public health pests, insects	110	Twin Swamp Nature Preserve	16
Quaternary biota	83	Ulrey, Wade	73, 216
Radiocarbon dating	83	Unionidae	33
<i>Ranunculus harveyi</i>	24	Upland Prairie Restoration	14, 16
Rare plants	26	<i>Valerianella chenopodifolia</i>	24
Richards, Ronald L.	83	Vanderburgh County	2
Ripley County	16	Vascular plant inventory	26
Ritzi, Christopher	70, 73	Vascular plants	19
Rivers, William Petty	83	<i>Verbesina virginica</i>	24
Roosting ecology, bats	70	Vermilion County, Illinois	34
Roosts, bat	216	Vermillion County, Indiana	34
<i>Rosa multiflora</i>	28	<i>Veronica anagallis-aquatica</i>	24
Rothrock, Paul E.	9	Versailles State Park Limestone Glade	13, 16
<i>Rubus flagellaris</i>	28	Vertebrate fossils	98
<i>Sagittaria australis</i>	24	Vigo County	34
Sandlin, Nina	111	<i>Villosa lienosa</i>	33
Saugany Lake	13, 16	Wabash Breaks Gravel Hill Prairie	17
Seabrook, Elizabeth	55	Wabash River mussels	33
Shafer mastodont	83	Waltz, Robert	105
Shawnee Hill Natural Region	13, 16	Warren County	15, 83
Sierwald, Petra	111	Washington County	50
Simon, Thomas P.	34, 55	Wea Creek Gravel Hill Prairie	17
Simon, Thomas P. IV	55	Webb, Jennifer	65
Sinkhole crayfish	34	Webster, Jackson Dan	224
Sparks, Dale	70, 73	Weisheit, Matthew	55
Species diversity	207	Wening-Sherrit Seep Springs	17
Spider mis-identifications	143	Whitaker, John	216
Spiders	111	White River, crayfish	58
Steuben County	15	Wilbur Wright NWR	13, 17
St. Joseph County	15	Wisconsin, spiders	111
Stratigraphic analysis	83	Wolf Lake	207
Stream habitat	33	Wood packing materials, insects	108
		Yellow Birch Ravine Nature Region	13, 17

INSTRUCTIONS TO AUTHORS

(revised July 2005)

General information.—Manuscripts and all correspondence should be sent to the Editor. To be eligible for publication in the *Proceedings*, at least one author must be a member of the Academy. Papers that have been presented at an Academy meeting may be given preference for publication. Submission of a manuscript to the Editor implies that it has not been sent to another publication, nor has it been published elsewhere. If it is accepted for publication in the *Proceedings*, it may not be republished without the written consent of the Academy.

All manuscripts are evaluated by referees. Submit three copies of the manuscript. Figures in manuscripts for review may be submitted as photocopies, and they should be approximately the size that they will be printed in the *Proceedings*.

After the manuscript has been accepted, the author will be asked to submit the manuscript as a paper copy and on a computer disc in a widely-used word processing program. Indicate clearly on the computer disc the **word processing program** and the **type of computer** (Mac or PC).

Galley proofs will be sent to the primary author for approval and correction.

Voucher specimens and permits: Voucher specimens of species used in scientific research should be deposited in a recognized scientific institution. Authors must indicate that the collection of specimens, especially of threatened or endangered species, was authorized by the appropriate governmental organizations. All type specimens must be deposited in a recognized museum collection.

Style.—Do not use right or full justification. Also, use a non-proportional font (e.g., Courier, but not Times Roman).

Title page.—The title page should include (1) the title in capital letters, (2) each author's name and address, (3) the running head (see below), and (4) the complete name, address, and telephone number of the author with whom proofs and correspondence should be exchanged, a FAX number and electronic mail address if available.

Abstract.—All manuscripts have an abstract, which should summarize the significant facts in the manuscript. The "ABSTRACT" heading in capital letters should be placed at the beginning of the first paragraph set off by a period. Use complete sentences, and limit the abstract to one paragraph and 250 words.

Keywords.—Give 3–5 appropriate keywords following the abstract.

Text.—Double-space text, tables, legends, etc. throughout. Three categories of headings are used. The first category (METHODS, RESULTS, etc.) is typed in capitals, centered, and on a separate line. The second (lower) category of heading, in bold type, begins a paragraph with an indent and is separated from the text by a period and a dash. (This paragraph begins with an example of this heading.) The third heading category may or may not begin a paragraph, is italicized and followed by a colon. (The paragraph below is an example.) Use only the metric system unless quoting text or referencing collection data.

Citation of references in the text: Cite only papers already published or in press. Include within parentheses the surname of the author followed by the date of publication. A comma separates multiple citations by the same author(s) and a semicolon separates citations by different authors, e.g., (Smith 1990), (Jones 1988; Smith 1993), (Smith 1986, 1987; Smith & Jones 1989; Jones et al. 1990).

Literature cited section.—Use the following style, and include the full unabbreviated journal title. Repeat the name for multiple references by the same author. Note that book titles have the first letter of each word capitalized.

Walter, J. & B. Hallet. 1979. Geometry of former subglacial water channels and cavities. *Journal of Glaciology* 23:335–346.

Walter, J. 1992. The significance and complexity of communication in moths. Pp. 25–66, *In* *Insect Communications: Mechanisms and Ecological Significance*. (P.N. Work & J.S. Rivers, eds.). Princeton University Press, Princeton, New Jersey.

Footnotes.—Footnotes are permitted only on the first printed page to indicate current address or other information concerning the author. These are placed together on a separate page at the end of the manuscript. Tables and figures may not have footnotes.

Running head.—The author's surname(s) and an abbreviated title should be typed all in capital letters and must not exceed 60 characters and spaces. The running head should be placed near the top of the title page.

Tables.—These should be typed double-spaced, one table to a page and numbered consecutively. Most tables contain only three horizontal lines (see recent issues for examples). Do not use vertical lines or shading. Include all pertinent information in the table legend (no footnotes).

Illustrations.—All art work must be camera-ready (mounted and labeled) for reproduction. Figures should be arranged so that they fit (vertically and horizontally) the printed journal page, either one column or two columns, with a minimum of wasted space. When reductions are to be made by the printer, pay particular attention to width of lines and size of lettering in line drawings. Multiple photos assembled into a single plate should be mounted with only a minimum of space separating them. In the case of multiple illustrations mounted together, each illustration must be numbered Fig. 1, Fig. 2, etc.) rather than given letter (A,B, etc.) designations. The name(s) of author(s), and an indication of top edge, and whether the illustration should be one or two columns wide, should be written on the back of the illustration. The overall dimensions should be no more than 11 inches (28 cm) × 14 inches (36 cm). Larger drawings present greater difficulty in shipping and greater risk of damage for which the *Proceedings* assumes no responsibility. In manuscripts for review, photocopies are acceptable, and should be reduced to the exact measurements that the author prefers in the final publication. Make notations in the text margins to indicate the preferred position of illustrations in the printed text. Color plates can be printed; but the author must assume the full cost, currently about \$600 per color plate.

Legends for illustrations should be placed together on the same page(s) and separate from the illustrations. Each plate must have only one legend, as indicated below:

Figures 1–4.—Right chelicerae of species of *Centruroides* from Timbuktu. 1. Dorsal view; 2. Prolateral view of movable finger; 3. *Centruroides* holotype male; 4. *Centruroides* male. Scale = 1.0 mm.

Page charges and reprints.—There are no page charges for members of the Academy. Corrections in proof pages must be restricted to printer's errors only; all other alterations will be charged to the author (currently \$3 per line).

Reprints are available only from Allen Press and should be ordered (with payment) when the author receives the proof pages. Allen Press will not accept reprint orders after the paper is published.

CONTENTS

Proceedings of the Indiana Academy of Science

Volume 114

Number 2

2005

Paleontology

- Palaeoecological Interpretation of Pollen, Macrofossils, Polygonal Fissures, and Taphonomy of the Shafer Mastodont Locality, Warren County, Indiana** by Anthony L. Swinehart, Ronald L. Richards, William Petty Rivers, Robert D. Hall, and Allyson K. Anderson..... 83

Zoology

- Insects and Other Arthropods of Economic Importance in Indiana in 2004** by Christopher M.F. Pierce, Timothy J. Gibbs, and Robert D. Waltz 105
- The Spider Species of the Great Lakes States** by Petra Sierwald, Michael L. Draney, Thomas Prentice, Frank Pasco, Nina Sandlin, Elizabeth M. Lehman, Vicki Medland, and James Louderman 111
- The Amphibians of the Merry Lea Environmental Learning Center of Goshen College, Noble County, Indiana** by Mary C. Linton and Andrew M. Gascho Landis 207
- Bats of Camp Atterbury in South-Central Indiana** by John O. Whitaker, Jr., Curtis L. Gummer, Art Howard, Wade A. Ulrey, and Virgil Brack, Jr. 216

Biography

- Jackson Dan Webster: A Life in the Field** by Daryl R. Karns 224

Index
